## Normal Range Wireless Display

Seven segment LED wireless displays with inbuilt wireless provision are designed for simplicity of installation. These displays can be interfaced in three ways :

- With indicators having inbuilt wireless provision
- Using wireless transmitter to be connected on TTD port
- Using wireless transmitter to be connected on RS232 port of appalto indicators or other make indicators

### Applications

- Weight indicators
- Process indicators

### Features of AND Wi-fi

- Facility to set channel ID using command
- Facility to set Wi-Fi transmission power using command
- Facility to configure the wireless display

### Benefits

- Distance of operation up to 50 meter
- Reduces installation cost & time
- No need of cable, casing - capping, laying, digging etc.
- Avoids breakdown due to chances of cable cut because of rodents, heavy load
- Many wireless displays can run with one weight indicator / transmitter
- Factory settable channel ID to run more than one set in same premises without any interference
- Wireless displays used with appalto Indicator having inbuilt Wi-Fi provides control for setting channel ID, transmission power and configuration

### Features of Wi-fi Transmitter

- Wi-Fi transmitter is available in two versions
  - For connecting to TTD port
  - For connecting to RS232 port

## Specifications for 2.3" 5 Digit

Model	2.3" 5 digit
Display Digit Height	50 mm
Dimensions Window	245 x 70
Slot (W) x (H) in mm	
Outer Dimensions complete display unit (W) x (H) x (D) in mm	470 x 114 x 55
Weight (approx.)	2.1 Kg

## Specifications for 4" 6 Digit

Model	2.3" 6 digit
Display Digit Height	50 mm
Dimensions Window	310 x 72
Slot (W) x (H) in mm	
Outer Dimensions complete display unit (W) x (H) x (D) in mm	470 x 114 x 55
Weight (approx.)	2.1 Kg

## Specifications for 8" 6 Digit

Model	4" 6 digit
Display Digit Height	100 mm
Dimensions Window	544 x 126
Slot (W) x (H) in mm	
Outer Dimensions complete display unit (W) x (H) x (D) in mm	760 x 180 x 50
Weight (approx.)	4.9 Kg
